LEC HANDRAIL BY WOODHOUSE

In essence, this LEC Lyon unit is a standalone luminaire that is designed to fit in to the Woodhouse range of Geo handrails and street furniture.

In mainland Europe, LEC Lyon has a long established reputation for the quality of their LED luminaires and so this relationship with Woodhouse should be a good combination.

The standard 300mm 24v unit has six LEDs. These are deliberately run at 300mA, slightly less than the usual 350mA. This is said to increase the life of the LEDs. The output of the 300mm unit is 360lm for neutral white.

The luminaire body is milled from a solid block of aluminium, anodised and has a potted pcb inside. It then has a sealed polycarbonate cover. It's rated at IP67 but I wouldn't be surprised if it was more.

There are two beam spreads available, 116 x 44 and 130 x 25 which is wider than most other products.

Should last for ever
