Wall-mounted

LIMA is a linear lighting solution designed to enhance walls and facades thanks to its uniform, powerful luminous flux, even at great heights. Surface-mounted and adjustable, it adapts perfectly to the need for direct or indirect lighting, while guaranteeing discreet integration thanks to its sleek design. LIMA can also be used to create continuous lines

for a fluid visual effect, ideal for both architecture and public spaces. Available in four-color process or MAM* versions, it can be adapted to any context and lighting environment. What's more, customizable powder-coating is available on request for perfect harmony with the environment.

**MAM (War memorial): Special version allowing the colors of the national flag to be projected onto memorials, reinforcing the symbolic and patriotic character of the sites.*
